

SUMMARY

Software Technical Program Manager with 7+ years driving embedded software and IoT product programs at ASUS across ARM/x86 platforms. Proven track record delivering BSP, Linux, and application-layer programs from concept through mass production for consumer electronics, edge computing, and robotics. Comfortable operating at the intersection of hardware, firmware, and software teams.

SKILLS

Program & Project Management: Agile/Scrum, OKRs, NPI lifecycle, roadmap planning, risk management, cross-functional alignment | Technical: Embedded Linux (BSP, drivers), Android, ARM/x86, IoT/edge computing, CI/CD pipelines | Tools: Jira, Asana, Trello, Visio, MS Project

CERTIFICATIONS

Project Management Professional (PMP), PMI ID 6005715

PROFESSIONAL EXPERIENCE

TECHNICAL PROGRAM MANAGER, SOFTWARE – NUC, ASUS;

TAIPEI, TAIWAN – OCT. 2024 – PRESENT

- Lead end-to-end software program management for consumer NUC product lines, covering roadmap, scope, BOM, and release readiness across concept → pilot → mass production
- Reduced software development cycle time by 15% by redesigning sprint cadence and cross-team dependency tracking across 5 engineering teams
- Own technical documentation strategy and maintain program health dashboards for senior leadership review project roadmap, scope, technical documentation, resources, bills of materials (BOM), and readiness from concept through pilot build and mass production for consumer electronics

SOFTWARE PROJECT MANAGER – IOT, ASUS;

TAIPEI, TAIWAN – OCT. 2019 – 2024

- Managed NPI programs for IoT edge platforms (SBCs, industrial gateways, industrial PCs) with partners across hardware and software stacks
- Coordinated BSP, driver, and application delivery for 10+ product SKUs on Embedded Linux and Android platforms, shipping to 5+ markets
- Drove IoT Cloud Console software planning and release cycles, aligning 5+ cross-functional teams (FW, SW, QA, manufacturing)

SOFTWARE PROJECT MANAGER – ROBOTICS, ASUS;

TAIPEI, TAIWAN – OCT. 2017 – 2019

- Defined product roadmap and managed device management program across Android, iOS, Linux, and Windows – from product definition through integration and launch
- Coordinated system integration across 3 internal teams and 2 external partners.

INTERNATIONAL SALES ASSOCIATE, TECO ELECTRIC AND MACHINERY CO., LTD.;

TAIPEI, TAIWAN, MARCH 2012 – MARCH 2015

- Managed full project lifecycle for industrial machinery orders: initiation, procurement, delivery, and P&L tracking
- Performed cost/revenue analysis and produced customer-facing technical project documentation

EDUCATION

MSc, Business and Management; University of Strathclyde Business School, Glasgow, U.K.
Sept. 2015 – Nov. 2016
